AP 5210 COMMUNICABLE DISEASES

Reference:

Education Code Section 76403

The District recognizes that response protocols for communicable diseases will vary according to the nature and type of pathogen, known modes of transmission, best practices for prevention, and established treatments.

In the event of the identification of a reportable communicable disease, appropriate District officials will coordinate required responses at District-owned or operated facilities and with Department of Health officials.

When a potential communicable disease case comes to the attention of a District employee, the employee's first step is to immediately contact their direct supervisor. The supervisor will inform the appropriate District designee, in accordance with established District protocols and procedures.

Office of Primary Responsibility: Office of Student Learning and Success, Student Services, Administrative Services
