

Academic Affairs

**BP 4107 HEALTH SCIENCE PROGRAMS**

**References:**

Title 22 Sections

**Program Specific Policies and Procedures**

Many Health Science programs have specialized program policies and procedures essential for consumer protection and/or required by accrediting/approval bodies to ensure students are prepared for the workplace. The coordinators of each program and the appropriate academic administrator shall ensure required program policies specific to each discipline are developed and implemented.

Each program ensures students are informed of the program-specific policies and procedures.

**Clinical Agency Agreements**

Many Health Science programs require that clinical affiliations with hospitals and agencies are developed and maintained. The District shall develop such affiliations as appropriate to the needs of each Health Science program. All new or continuing clinical affiliations containing substantive changes shall be approved by the Board.
