**EMERGENCY RESPONSE AND EVACUATION PROCEDURES**

General information about the emergency response and evacuation procedures for the District are publicized each year as part of the District's Clery Act compliance efforts and that information is available on the District web site via the Police Department link.

All members of the campus community are notified on an annual basis that they are required to notify the District Police Department of any incident on campus that involves a significant emergency or dangerous situation that may involve an immediate or ongoing threat to the health and safety of students and employees on campus. District Police Department has the responsibility of responding to, and summoning the necessary resources, to mitigate, investigate, and document any situation that may cause a significant emergency or dangerous situation. In addition, District Police Department has a responsibility to respond to such incidents to determine if the situation does in fact, pose a threat to the community. If so, federal law requires that the institution immediately notify the campus community or the appropriate segments of the community that may be affected by the situation.

Upon confirmation or verification by the District that a legitimate emergency or dangerous situation involving an immediate threat to the health or safety of students or employees occurring on campus, the District will determine the content of the message and will use some or all of the systems described below to communicate the threat to the campus community or to the appropriate segment of the community, if the threat is limited to a particular building or segment of the population. The District will, without delay, take into account the safety of the community, determine the content of the notification and initiate the notification system, unless issuing a notification will, in the judgment of the first responders (including, but not limited to the District Police Department, compromise the efforts to assist a victim or to contain, respond to, or otherwise mitigate the emergency.

In the event of a serious incident that poses an immediate threat to members of the campus community, the District has various systems in place for communicating information quickly. Some or all of these methods of communication may be activated in the event of an immediate threat to the campus

community. These methods of communication include network emails, emergency text messages that can be sent to a cell phone (individuals can sign up for this service on the District web site), public address system in specific buildings, District website. The District will post updates during a critical incident on the District web site at [www.marin.edu](http://www.marin.edu). Individuals can call the District's recorded information telephone line at 415-457-8811 for updates.

The District's Public Information Officer will be responsible for the dissemination of emergency information to the larger community through cell phone alerts to parents/guardians, radio, TV alerts.

### **TESTING EMERGENCY RESPONSE AND EVACUATION PROCEDURES**

An evacuation drill is coordinated by the District Police Department once per year for campus facilities. Students learn the locations of the emergency exits in the buildings and are provided guidance about the direction they should travel when exiting each facility for a short-term building evacuation. The District Police Department has established primary evacuation locations in advance. However, these locations may be subject to change due to time of day, location of the building being evacuated, the availability of the various designated emergency gathering locations on campus, and other factors such as the location and nature of the threat. The District Police Department and District staff on the scene will communicate information to students regarding the developing situation or any evacuation status changes.

Evacuation drills are monitored by the District Police Department and District administration to evaluate egress and behavioral patterns. Reports are prepared by participating departments which identify deficient equipment so that repairs can be made immediately. Recommendations for improvements are also submitted to the appropriate departments and offices for consideration.

The District conducts numerous announced and unannounced drills and exercises each year and conducts follow-through activities designed for assessment and evaluation of emergency plans and capabilities. District Police Department and District administration coordinate announced and unannounced evacuation drills once per year, as described above, to test the emergency response and evacuation procedures, and to assess and evaluate the emergency evacuation plans and capabilities. For each test conducted, District Chief of Police or Designee will document a description of the exercise, the date, time, and whether it was announced or unannounced. The District will create a summary of its emergency response and evacuation procedures in conjunction with at least one drill or exercise each calendar year.

In the event of an emergency, natural disaster or the occurrence of a hazardous condition the District must ensure the activation of a plan or procedures to protect and govern employees, students, visitors and children in childcare programs on its campuses and facilities. The District should implement a campus emergency management team to aid in creation and implementation of its emergency procedures or plan.

The District's Emergency Operations Plan shall meet California's Standardized Management System (SEMS) and the National Incident Management System (NIMS) standards. The purpose of SEMS is to provide a standardized response to emergencies involving multiple jurisdictions or multiple agencies. Compliance with requirements includes the use of the basic principles and components of emergency management which include the Incident Command System (ICS), multi-agency or inter-agency coordination, the operational area concept and established mutual aid systems. SEMS and NIMS both utilize ICS. ICS is the combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure that is responsible for the management of resources to effectively accomplish the District's stated objectives in response to an incident.

For major incidents NIMS provides a consistent nationwide template to ensure that local, state, and federal agencies work together to prepare for, prevent, respond to, and recover from incidents. The following are criteria and areas that should be included in the District's Emergency Response Plan.

Compliant emergency response plans provide information on preparedness, prevention, response, recovery, and mitigation policies and procedures.

Compliant emergency response plans also provide information on coordinating with the appropriate local, state, and federal government authorities, and nongovernmental entities on comprehensive emergency management and preparedness activities.

### **SEMS**

Below is information that specifically relates to SEMS and compliance with SEMS. State agencies are required by law to use SEMS. There are five designated levels in the SEMS organization: field response, local government, operational areas, regions, and state. Each level is activated as needed.

- **"Field response level"** commands emergency response personnel and resources to carry out tactical decisions and activities in direct response to an incident or threat.
- **"Local government level"** manages and coordinates the overall emergency response and recovery activities within their jurisdiction.
- **"Operational area level"** manages and/or coordinates information, resources, and priorities among local governments within the operational area and serves as the coordination and communication link between the local government level and the regional level.
- **"Regional level"** manages and coordinates information and resources among operational areas within the mutual aid region designated pursuant to Government Code Section 8600 and between the operational areas and the state level. This level along with the state level coordinates overall state agency support for emergency response activities.
- **"State level"** manages state resources in response to the emergency needs of the other levels, manages and coordinates mutual aid among the mutual aid regions and between the regional level and state level, and serves as the coordination and communication link with the federal disaster response system.

The local government level, operational area level, regional level, and the state level shall include the following functions:

- Management,
- Operations,
- Planning/intelligence,
- Logistics, and
- Finance/Administration.

### **Training**

The District shall determine the appropriate level(s) of SEMS training for each of its employees. This determination is dependent upon the employee's potential assignment during an emergency response

situation. The District should ensure that its emergency response personnel can demonstrate and maintain, the minimum SEMS performance objectives, at the appropriate level, [as](#) is required by the District's training programs.

### **Compliance with SEMS**

To be compliant with SEMS requirements the District must include the five essential SEMS functions in its Emergency Response Plan. To be in compliance with SEMS, the Emergency Response Plan must at minimum, address the following functions:

- Management,
- Operations,
- Logistics,
- Planning/Intelligence, and
- Finance/Administration.

Local government must use SEMS in order to be eligible for state funding for response-related personnel costs which occur in response to an incident. The District shall use SEMS to coordinate multiple jurisdiction or multiple agency emergency and disaster operations.

In the event that a local emergency occurs and the Governor declares a state of emergency, if the District responds to said emergency, the District shall complete and transmit an after action report to the California Office of Emergency Services (OES) within 90 days of the close of the incident period. The after action report shall at a minimum include a review of the response actions taken, the application of SEMS, the identified training needs, suggested modifications to SEMS, necessary modifications to the SEMS plans and procedures and an up to date recall of the recovery actions.

### **NIMS**

The District must also be in compliance with the federal requirements for emergency preparedness or NIMS.

The components of NIMS are:

- Command and Management including ICS,
- Preparedness,
- Resource Management,
- Communications and Information Management,
- Supporting Technologies, and
- NIMS Management and Maintenance.

### **Compliance with NIMS**

To comply with NIMS requirements, the District must ensure that its employees receive the appropriate NIMS training. NIMS compliance is measured by a performance-based “metrics” system. In addition to the training requirements, the District must also comply with state and federal preparedness laws for public institutions.

The District can work with the Disaster Resistant California Community Colleges (DRCCC) program to ensure it's in compliance with state and federal requirements.

### **Definitions**

The following definitions may be relevant to the implementation of the Emergency Response Plan:

**Emergency:** a condition of disaster or of extreme peril to the safety of persons and property caused by such conditions as air pollution, fire, flood, hazardous material incident, storm, epidemic, riot, drought, sudden and severe energy shortage, plant or animal infestations or disease, the Governor's warning of an earthquake or volcanic prediction, or an earthquake or other conditions, other than conditions resulting from a labor controversy.

**Incident:** an occurrence or event, either human-caused or by natural phenomena, that requires action by emergency response personnel to prevent or minimize loss of life or damage to property and/or natural resources.

**Incident Command System (ICS):** the nationally used standardized on-scene emergency management concept specifically designed to allow its user(s) to adopt an integrated organizational structure equal to the complexity and demands of single or multiple incidents without being hindered by jurisdictional boundaries. ICS is the combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure, with responsibility for the management of resources to effectively accomplish stated objectives pertinent to an incident.
